Product: 5” Conventional Springs

Used On: Dirt Modified

Why did Chase Choose Hyperco?

Chase had heard about Hyperco throughout his career and used them in the past. This season, Chase and his team switched exclusively to Hyperco springs because Hyperco offers superior products that perform well and don't lose rate.

Chase also enjoys working the Hyperco team. They're very down to Earth, very helpful, and are always able to provide what Chase's team needs. They offer great tech support on their products as well, all things we ultimately look for in any manufacturer.

“Ever since I started big car racing, I've heard of Hyperco springs and have seen a lot of good things about them. Since switching to Hyperco I can tell a huge difference in the performance of our race cars.”

Take Your Racing Program to the Next Level

“I would recommend Hyperco Springs to anyone that wants to up their racing program,” said Chase. If you're interested in getting on the Hyperco team, you can get on their website at hypercoils.com and check out what amazing products they have to offer for your racing.
